## Statement of Cash Flows

---

The Statement of Cash Flows (or cash flow statement) is one of the main financial statements used by investors. It shows the *cash* generated and used during a specific time period. Ideally a company should generate positive cash flows; this will make it more likely to find investors for the future. The positive or negative net cash flow identified at the end of the statement of cash flows is equal to the total change in the cash account balance.

The cash flow statement reports the cash inflows and outflow in three categories:

1. Operating activities – reports the accrual net income and adjusts it for changes in current asset and current liability accounts
2. Investing activities – Reports the purchase and sale of fixed assets, marketable securities, and any other investment accounts
3. Financing activities – reports the changes to ownership equity and payment or borrowing of long-term liabilities

The cash flow statement can be prepared using the indirect method where differences in the balance sheet accounts for two time periods are compared. The first step is to determine if the changes in each account represent an increase or decrease of cash. An increase of cash (also called an “inflow” or “source of cash”) is added when converting accrual net income to cash net income. A decrease of cash (also called an “outflow” or “use of cash”) is subtracted when converting accrual net income to cash net income.

For instance, if accounts receivable increased from one period to the next, then revenue would also have increased. The revenue would overstate the amount of cash received and the net income would be higher than it would be in cash basis accounting. To adjust the income, the increase in A/R represents a decrease to net income. It is an outflow of cash. This is true for any other asset account – an increase in an asset account corresponds to an outflow of cash; a decrease corresponds to an inflow of cash.

If a liability increased, (for example, A/P), that means we are borrowing cash to finance a purchase or pay expenses. The actual expenses or purchases paid in cash are less than the total reported accrual operating expenses; this means the accrual net income is lower than it would be in cash basis accounting. The increase in a current liability is a source of cash (inflow), and added to net income when converting to the cash basis.

There are some items that are only ever an inflow or outflow of cash: depreciation expense, capital gain/loss, dividends, and net income/loss. Dividends are paid out, so they represent an outflow of cash. Net income is an inflow of cash into the business. Capital gains and losses occur from the sale of long-term assets. If there is a capital gain it would increase the net income, but not the cash, so to adjust to the cash basis, we would treat it as an outflow of cash (and inflow for a capital loss).

The table on the next page summarizes changes in accounts and whether they are inflows or outflows of cash.

| Description            | Change in Account | Inflow or Outflow of Cash |
|------------------------|-------------------|---------------------------|
| Asset                  | Increase          | Outflow                   |
| Asset                  | Decrease          | Inflow                    |
| Liability/Common Stock | Increase          | Inflow                    |
| Liability/Common Stock | Decrease          | Outflow                   |
| Depreciation           |                   | Inflow                    |
| Capital Gain           |                   | Outflow                   |
| Capital Loss           |                   | Inflow                    |
| Net Income             |                   | Inflow                    |
| Net Loss               |                   | Outflow                   |
| Dividends              |                   | Outflow                   |

Once each account change in the two balance sheets has been recognized as an inflow or outflow of cash (Note: CASH and RETAINED EARNINGS in the balance sheet are NOT recognized as inflows or outflows and can be ignored), the next step is to categorize the type of cash flow each change belongs to.

#### Cash Flow from Operating Activities

Net income/net loss  
 Current assets (NOT marketable securities!)  
 Current liabilities (NOT loans! NOT notes payable!)  
 Depreciation  
 Capital gain/capital loss

#### Cash Flow from Investing Activities

Long-term assets (fixed assets)  
 Marketable securities  
 All investments

#### Cash Flow from Financing Activities

Long-term liabilities  
 Loan/Notes payable  
 Current mortgage payable  
 Common stock  
 Dividends

In order to prepare the statement of cash flows, you would list each section as above with the amount of inflow (+ amount) or outflow (- amount) of cash for each item. You would calculate the net cash flow for each section at the end. Then take the sum of all three sections to get the net cash flow increase or decrease. This number should match the change in the cash account balance. You then list the beginning and ending cash balance for the year to prove that the sum of the net cash flow increase/decrease and the beginning cash balance gives the ending cash balance.

## Practice Problems

1. Indicate whether each given change in account balance represents an inflow or outflow of cash and its categorization in the cash flow statement (operating, financing, or investing).

| Activity                          | Cash Inflow or Outflow? | Section |
|-----------------------------------|-------------------------|---------|
| Accounts receivable increase      |                         |         |
| Interest payable increase         |                         |         |
| Payment of cash dividend          |                         |         |
| Purchased equipment               |                         |         |
| Common stock increase             |                         |         |
| Prepaid expenses decrease         |                         |         |
| Unearned revenue decrease         |                         |         |
| Sale of marketable securities     |                         |         |
| Capital loss                      |                         |         |
| Current mortgage payable decrease |                         |         |
| Sale of long-term investment      |                         |         |
| Borrowing on note payable         |                         |         |
| Common stock decrease             |                         |         |
| Inventory increase                |                         |         |
| Wages payable decrease            |                         |         |
| Mortgage payable increase         |                         |         |
| Accumulated depreciation          |                         |         |
| Sale of land                      |                         |         |

2. Net income is \$353,000; depreciation expense is \$42,000; accounts receivable increased \$1,080; credit card receivables decreased \$2,100; prepaid insurance increased \$3,440; inventory decreased \$4,500; accounts payable increased \$5,200; wages payable decreased \$2,900. Prepare a statement for net cash flow from operating activities.
3. A Nanaimo resort showed the following changes in current accounts during the annual operating period ending December 31, 2009. Net income for 2009 was \$141,100. Cash dividends of \$154,00 were paid out. Prepare a statement of cash flows (SCF).

| <b>Assets</b>                            | <b>31-Dec-08</b>   | <b>31-Dec-09</b>   |
|--|--------------------|--------------------|
| <i>Current Assets</i>                    |                    |                    |
| Cash                                     | \$25,200           | \$29,600           |
| Accounts receivable                      | 12,550             | 12,900             |
| Credit card receivables                  | 9,700              | 8,000              |
| Inventories                              | 2,850              | 1,100              |
| Marketable securities                    | 2,000              | 3,000              |
| Prepaid expenses                         | <u>6,100</u>       | <u>4,200</u>       |
| <b>Total Current Assets</b>              | <b>\$58,400</b>    | <b>\$58,800</b>    |
| <i>Property, plant, and equipment</i>    |                    |                    |
| Land                                     | 194,000            | 194,000            |
| Building                                 | 9,800,000          | 9,800,000          |
| Furniture                                | 184,000            | 134,000            |
| Equipment                                | 736,400            | 803,400            |
| Accumulated Depreciation                 | <u>(2,400,000)</u> | <u>(2,544,200)</u> |
| <b>Net Property, plant and equipment</b> | <b>8,514,400</b>   | <b>8,387,200</b>   |
| Other Assets                             | 509,000            | 609,000            |

|   |                           |                           |
|---|---------------------------|---------------------------|
| <b>Total Assets</b>                         | <b><u>\$9,081,800</u></b> | <b><u>\$9,055,000</u></b> |
| <b>Liabilities and Stockholders' Equity</b> |                           |                           |
| <i>Current Liabilities</i>                  |                           |                           |
| Accounts payable                            | 13,700                    | 15,700                    |
| Wages payable                               | 4,200                     | 5,000                     |
| Notes Payable                               | 4,900                     | 3,700                     |
| Current mortgage payable                    | <u>15,300</u>             | <u>15,900</u>             |
| <b>Total Current Liabilities</b>            | <b>38,100</b>             | <b>40,300</b>             |
| <i>Long-term Liabilities</i>                |                           |                           |
| Mortgage payable                            | 7,710,200                 | 7,704,300                 |
| <b>Total Liabilities</b>                    | <b><u>\$7,748,300</u></b> | <b><u>\$7,744,600</u></b> |
| <i>Stockholders' Equity</i>                 |                           |                           |
| Common stock                                | 960,000                   | 950,000                   |
| Retained earnings                           | <u>373,500</u>            | <u>360,400</u>            |
| <b>Total Stockholders' Equity</b>           | <b>1,333,500</b>          | <b>1,310,400</b>          |
| <b>Total Liabilities and SE</b>             | <b><u>\$9,081,800</u></b> | <b><u>\$9,055,000</u></b> |

4. Prepare an SCF for the year 2010 based on the following information. The net income for 2010 is \$8,000 and dividends of \$7,000 were paid.

| <b>Assets</b>                               | <b>2009</b>            | <b>2010</b>            |
|---|------------------------|------------------------|
| <i>Current Assets</i>                       |                        |                        |
| Cash  | \$15,800               | \$16,600               |
| Credit card receivables                     | \$813                  | \$747                  |
| Accounts receivable                         | 7,387                  | 6,853                  |
| Inventories                                 | 4,925                  | 6,275                  |
| Marketable securities                       | <u>2,975</u>           | <u>3,425</u>           |
| <b>Total Current Assets</b>                 | <b>\$31,900</b>        | <b>\$33,900</b>        |
| <i>Property, plant, and equipment</i>       |                        |                        |
| Furniture/Equipment                         | \$15,700               | \$19,700               |
| Accumulated depreciation                    | <u>(4,600)</u>         | <u>(5,600)</u>         |
| <b>Net Property, plant and equipment</b>    | <b>\$11,100</b>        | <b>\$14,100</b>        |
| <b>Total Assets</b>                         | <b><u>\$43,000</u></b> | <b><u>\$48,000</u></b> |
| <b>Liabilities and Stockholders' Equity</b> |                        |                        |
| <i>Current Liabilities</i>                  |                        |                        |
| Accounts payable                            | \$3,800                | \$6,100                |
| Accrued expenses payable                    | 800                    | 700                    |
| Taxes payable                               | <u>2,400</u>           | <u>1,200</u>           |
| <b>Total Current Liabilities</b>            | <b>\$7,000</b>         | <b>\$8,000</b>         |
| <i>Long-term Liabilities</i>                |                        |                        |
| Mortgage payable                            | \$24,800               | \$26,800               |
| <b>Total Liabilities</b>                    | <b>\$31,800</b>        | <b>\$34,800</b>        |
| <i>Stockholders' Equity</i>                 |                        |                        |
| Common stock                                | \$5,200                | \$6,200                |
| Retained earnings                           | <u>6,000</u>           | <u>7,000</u>           |
| <b>Total Stockholders' Equity</b>           | <b>\$11,200</b>        | <b>\$13,200</b>        |
| <b>Total Liabilities and SE</b>             | <b><u>\$43,000</u></b> | <b><u>\$48,000</u></b> |

## Solutions

1.

| Activity                          | Cash Inflow or Outflow? | Section   |
|-----------------------------------|-------------------------|-----------|
| Accounts receivable increase      | Outflow                 | Operating |
| Interest payable increase         | Inflow                  | Operating |
| Payment of cash dividend          | Outflow                 | Financing |
| Purchased equipment               | Outflow                 | Investing |
| Common stock increase             | Inflow                  | Financing |
| Prepaid expenses decrease         | Inflow                  | Operating |
| Unearned revenue decrease         | Outflow                 | Operating |
| Sale of marketable securities     | Inflow                  | Investing |
| Capital loss                      | Inflow                  | Operating |
| Current mortgage payable decrease | Outflow                 | Financing |
| Sale of long-term investment      | Inflow                  | Investing |
| Borrowing on a note payable       | Inflow                  | Financing |
| Common stock decrease             | Outflow                 | Financing |
| Inventory increase                | Outflow                 | Operating |
| Wages payable decrease            | Outflow                 | Operating |
| Mortgage payable increase         | Inflow                  | Financing |
| Accumulated depreciation          | Inflow                  | Operating |
| Sale of land                      | Inflow                  | Investing |

2.

### Net Cash Flow from Operating Activities

#### Operating Activities

|                                     |               |           |
|-------------------------------------|---------------|-----------|
| Net Income                          | \$353,000     |           |
| Accounts receivable (increased)     | (1,080)       |           |
| Credit card receivables (decreased) | 2,100         |           |
| Prepaid insurance (increased)       | (3,440)       |           |
| Inventory (decreased)               | 4,500         |           |
